

YOUR PACE PLAN

Ghost Subie Adventures — Preparedness Without Panic

A comms + nav backup plan for every trip. Cell towers don't follow you off the pavement.

PACE is a military planning tool: Primary, Alternate, Contingency, Emergency. Four layers of communication and navigation, stacked so when one fails the next is already ready. This is the exact setup we run in the Ghost on every family trip — the blank lines are yours to fill before you roll.

P PRIMARY • PHONE + CARPLAY

Works great — until it doesn't. Share your live location with your check-in person before you leave signal.

Check-in person: _____

Check-in times: _____

A ALTERNATE • OFFLINE MAPS DOWNLOADED

OnX Offroad — the one we use. Download your full route plus the bailout roads before you leave wifi.

Map areas downloaded: _____

C CONTINGENCY • GMRS RADIO

Midland USA in the Ghost. No cell needed — rig-to-rig and camp comms. Agree on the channel before you need it.

Channel / callsign: _____

E EMERGENCY • SATELLITE SOS

InReach or your phone's satellite SOS. The button you never want to press — which is exactly why you test it before every big trip.

Tested on: _____

"Two is one, one is none." If you only have one way to call for help, you have zero.

YOUR TRIP

Route: _____

Wheels down / back by: _____

If we're overdue, call: _____
